SUBJECT: Document Review

Per your request I have reviewed the Final Historical Information Summary and Preliminary Health Risk Assessment -- OU 3. Since the Division of Radiation Control had not reviewed it, I felt that it was important to receive their input. Therefore, I asked both Al Hazle and Rob Terry for their comments.

In this memo, I have incorporated Al's comments with my own. Attached is Rob Terry's review.

It is our opinion that this document is incomplete and should not be accepted as final. Issues of concern which were brought up by Al and/or me, but are addressed by Rob in his memo, are not included in this correspondence so as not to be repetitive (e.g., needed reference to Cleveland, et al.'s work, inconsistent exposure duration variables throughout document).

c. Barbara Barry
Ellen Mangione, M.D., M.P.H.
Bob Quillin
Rob Terry
